WORK EXPERIENCE

COG1 - WordPress Developer

JAN 2015 - Jul 2017

- Collaborated with a team of 3 to 5 web developers in constructing custom WordPress sites based on design layouts
- Functioned as an assistant project manager for the web development team during the completion of a 5 month project.
- Regulated the web development team to maintain productivity and compliance with client deadlines.
- Simultaneously collaborated with the development team on multiple projects
- Developed websites in diverse fields such as real estate, Hackreactor, new upcoming artists, small business etc
- Supported the Software Quality Assurance engineers in testing Wordpress sites to ensure that everything is effectively operating, and that design layouts are balanced.

New Renaissance Institute - WordPress Developer JAN 2014 - May 2014

- Created design plans for clientele
- Developed designs into fully functional website from scratch
- Effectively transferred all old site content to new site.

WORKS

IREI.COM / MAY 2017

- Collaborated with a team of both frontend and backend developers in constructing a fully functional custom WordPress site.
- Functioned as the development team lead by regulating development productivity, maintaining project schedules and strategizing on time delivery of content

COG1.COM / JANUARY 2016

- Collaborated with a team of web development to create fully responsive custom WordPress sites based on design team mock ups and style documents.
- Supported the Software Quality Assurance engineers in testing the site and optimize any existing files so that they may run at an efficient speed.

REACTORCORE.COM / JUL 2015

- Converted site designs to live web pages using HTML, CSS and Javascript
- Converted static web pages to dynamic custom WordPress templates with the use of php and plugin ACF (Advanced Custom Fields).
